

Logtel Computer Communications is a leading Knowledge-Transfer company with a highly accessible global presence. We spread Professional Telecommunication Skills to industry players and individuals seeking reliable, certifying, qualifying and price-competitive training programs.

Company Overview

From the early days of 1984 when Telecommunication was just growing, offering the first breaking-through solutions, Dr. Jacques Bensimon came in to address the wide vacuum in professional skills designed to qualify new human resources necessary to meet the requirement of a rapidly increasing industry.

Thanks to 24 years of experience since its foundation, Logtel now transfers professional Telecommunication Knowledge in a wider-than-ever range of topics. Using its most valued resource – the excellent pool of trainers who come not merely from the academic world of Communications but rather from senior positions within the cutting edge telecom companies in the world. Their daily practices in these firms provide that extra treat Logtel brings to its classrooms: a Hands-On approach and personal “touch” to each and every one of the delivered technological topics.

Our global affiliates, distributors and partners together with Logtel’s network of lecturers are all fully dedicated to professionally transferring the accumulated knowledge & skills in a vendor-independent state of mind, where YOU are given the large picture and insight required to apply this knowledge in your career, company, factory, and office.

Logtel management, lecturers, staff and partners share the passion of Telecommunication Technologies and the knowledge necessary to enrich its practice. Enrich YOUR Telecommunication practices.

Benefits for Our Customers

We are driven by the desire to become our client’s trusted provider of its training needs, anticipating and fulfilling professional knowledge & skills requirements to their employees, customers, and decision-makers in any location around the globe.

- ▶ Apply cutting-edge practices by being the first in your market to address high-end advanced Telecom trends & transformations

Our Mission

To empower our clients with high-tech knowledge by enabling access to broad-spectrum expertise while creating added value

Corporate & Public Courses

Trainer-led Courses

Logtel's core business is in Knowledge Transfer through its trainer-led courses. You will find a rich platform of lecturers all whom main daily practice revolves around their senior positions in industry-leading firms in Israel. Your returned value when consuming any of our telecom courses is the professional dimension you receive.

When you send your employees or attend our courses you can be assured to receive not only the most adequate and suitable technological coverage of the topic, but also a personal resource with hands-on cutting-edge "inside" information on anything that goes on in Telecom. That's knowledge-transfer in its fullest form!

Corporate-Tailored Courses

Beyond your benefit in bringing in our lecturers, you gain immensely from the personal coordination between you and our training advisors or even with the designated trainer! Pre-customize the length, depth, and course objectives related to the audience you are allocating for the program.

The choice is yours to make. Choose from any of the hottest to most basic telecom technological topics. Gain insight from concurrent developments in the industry as you receive an overview of the most revolutionary telecom

Consulting and Technological Direction

It's time to tap your market from the peak

As revolutionary solutions and products penetrate our markets your pace must be enhanced to lead and retain your edge. Your challenge as a competitive Telecom player striving to deploy the appropriate technologies in the most efficient and cost effective way should now be addressed. LOGTEL is motivated to achieve this challenge. You will be accompanied by a reputable, widely recognized provider well networked and associated with professional telecom services for development and deployment of sophisticated communication networks and systems.

LOGTEL offers assistance to companies for:

- Definition and Requirements
- Design
- Staff Training
- Implementation
- Integration
- Acceptance Tests

Logtel will bring in its core team of leading and outstanding international telecom professional experts. Their experience accounts for dozens of years assisting customers in meeting objectives. These experts are deeply involved, motivated and experienced in all areas of Telecom.

E-Learning and Live Webinars

Train employees, maintain productivity

Logtel is proud to introduce you to the most accessible training you will ever find: e-Learning. From now on your training needs are met neither with both hassle and logistic requirements nor with productivity loss during the training days where your employees undertaking the course are away from their workstations.

The package is provided to telecos and other firms who wish to provide their employees with access to certified and qualifying courses, monitoring their progress, exam scores, and most importantly - their satisfaction from the new training tool you have enhanced their practical skills with.

Access the most dynamic Channel

Using an advanced Online Meeting Center ("Webinar") you can easily and quickly log on to learn of Logtel marketing opportunities, Course introductions, Live 45-minute 'teasers' on HOT and advanced topics, and general meetings with Logtel's advisors on how you can further your interests using Training, Knowledge Transfer, and Consulting.

You may customize the next Webinar to your needs! Just tell us what you need

TTT & Franchise

Your Own Telecom Trainers; The Ultimate Operational Convenience

If you run a Training center of any size in the Computers, IT or Telecom fields you might find our invitation to adopt Telecom communication into your array of topics pretty appealing.

Find out your market's needs of Telecom skills and know-how. This will usually reveal a steady trend of growth in demand for skilled workers for Telecos and firms, calling out to identify the source for such required skills.

Self-Manage a Regional Telecom Training Operation

A TTT course will allow local trainers to gain the know-how of training and delivering technology-related topics. The wide-ranged syllabus will enable you to begin with no delay offering delivery of our "TelecomXpert" program, - which can be offered as a 3-week course.

This way, the Train-The-Trainer program opens up an exceptional opportunity of becoming a Logtel full franchise. "TelecomXpert" which is a 10-day 160-credit course with hands-on facilities and labs will be the first of many to come courses all run locally by you, as a Logtel Approved Training Center. Directly provide customers with all that Logtel represents including worldwide-recognized certification proven expertise and access to license-renewed high-end training material.
